1. Structure of the company

Bird Construction Inc. (the "Company") is a corporation incorporated in the province of Ontario, Canada. The address of the Company's registered office is 5700 Explorer Drive, Suite 400, Mississauga, Ontario, Canada. The Company's common shares are traded on the Toronto Stock Exchange ("TSX") under the symbol BDT.

The Company operates from coast-to-coast-to-coast and services all of Canada's major geographic markets through a collaborative, safety-first approach. The Company provides a comprehensive range of construction services, self-perform capabilities, and innovative solutions to the industrial, buildings, and infrastructure markets. The Company uses a variety of contract delivery methods including construction management, cost reimbursable, integrated project delivery ("IPD"), alliance agreement, progressive design-build - target price, progressive design-build, design-build finance, design-build, stipulated sum, unit price, and public private partnership ("PPP") contract delivery methods.

2. Basis of preparation

Statement of compliance

These unaudited interim condensed consolidated financial statements (the "financial statements") have been prepared in accordance with IFRS Accounting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34 *Interim Financial Reporting*. These financial statements do not include all of the information and disclosures required in the Company's annual consolidated financial statements and should be read in conjunction with the Company's annual consolidated financial statements for the year ended December 31, 2025. These financial statements were authorized for issue on November 11, 2026 by the Company's Board of Directors.

Functional and presentation currency

These financial statements are presented in Canadian dollars, which is the Company's functional currency. Unless otherwise indicated, all financial information presented has been rounded to the nearest thousand.

Basis of measurement

These financial statements have been prepared on a going concern and historical cost basis, except for certain financial assets, derivative financial instruments and liabilities for cash-settled share-based payment arrangements which are measured at fair value as detailed in the material accounting policies described in Note 4.

Segmented results

Segment results are reviewed by the Company's chief operating decision maker to assess performance and allocate resources within the Company. Management applies judgement in the aggregation of the Company's operating segments and has determined that the Company operates in one reportable segment being the general contracting sector of the construction industry. The Company's operating segments have similar economic characteristics in that the Company's operating business units provide comparable construction services, use similar contracting methods, have similar customer types, have similar long-term economic prospects, share similar cost structures, and operate in similar regulatory environments.

3. Use of estimates and judgements

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of revenues, expenses, assets, liabilities and the disclosure of contingent assets and liabilities at the reporting date.

Uncertainty about these assumptions and estimates could result in a material adjustment to the carrying amount of an asset or liability and/or the reported amount of revenue and expense in future periods. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. Estimates and judgements used in the preparation of these financial statements are consistent with those used in the preparation of the Company's annual consolidated financial statements for the year ended December 31, 2025 except as described below.

Stock warrants

The valuation of the Company's stock warrants issued to a customer requires the application of significant judgement and estimation in the measurement of the derivative liability and contract-related asset at inception, and subsequent remeasurement of the derivative liability. The fair value of each tranche is determined using an option pricing model. The valuation of the stock warrants involves the selection of option pricing model inputs, including:

- expected share price volatility, which is based on the historical volatility of the Company's common shares over a period corresponding to the expected term of the warrants,
- expected term, which represents the contractual term of the warrants,
- risk-free interest rate, which is based on the yield of Government of Canada bonds with a similar tenor, and;
- expected dividend yield, which is based on the Company's expected dividend payments

Changes in these estimates and assumptions could result in material changes in the carrying amount of the derivative liability and contract-related asset, and the related gains or losses recognized in earnings.

4. Material accounting policies

The accounting principles used in the preparation of these financial statements are consistent with those followed in the preparation of the Company's consolidated financial statements for the year ended December 31, 2025 except for the following:

Stock warrants

The Company's stock warrants issued to a customer in connection with a strategic partnership arrangement are classified as derivative financial liabilities, as on settlement, they may not result in the issuance of a fixed number of the Company's common shares. The warrants are initially recognized at fair value and subsequently remeasured at fair value at each reporting date, with changes in fair value recognized in profit or loss. The fair value of the warrants is determined using an option pricing model and incorporates assumptions including expected share price volatility, risk-free interest rates, expected term, and the probability of achieving the vesting conditions for each tranche. The valuation is classified within Level 2 of the fair value hierarchy. At initial recognition, the fair value of the stock warrants is recognized as a derivative liability with a corresponding contract-related asset, representing a payment to the customer and a reduction of the overall transaction price of the related contract. Subsequent to initial recognition, the contract-related asset is amortized as a reduction of revenue on a systematic basis as the Company satisfies its performance obligations under the related construction contracts. Gains and losses arising from the subsequent remeasurement of the warrant liability are recognized in finance and other income or finance and other costs.

Share-based payments

For equity-settled share-based payments, the Company values the transaction at the fair value of goods or services received unless the value is not reliably estimable, in which case the transaction is valued at the fair value of the equity instruments granted.

Senior unsecured notes

The Company’s senior unsecured notes are classified as financial liabilities and are initially recognized at fair value, net of directly attributable transaction costs. Subsequent to initial recognition, the notes are measured at amortized cost using the effective interest method. Interest expense is recognized in finance

and other costs over the term of the notes using the effective interest rate, which incorporates the amortization of transaction costs.

5. Future accounting changes

There are new accounting standards and amendments to accounting standards and interpretations that are effective for annual periods beginning on or after January 1, 2027 that have not been applied in preparing the financial statements for the period ended September 30, 2026.

On April 9, 2024, the IASB issued IFRS 18 *Presentation and Disclosure in Financial Statements* to improve reporting of financial performance. IFRS 18 replaces IAS 1 *Presentation of Financial Statements*. It carries forward many requirements from IAS 1. IFRS 18 applies to annual reporting periods beginning on or after January 1, 2027. Earlier application is permitted. The key new concepts introduced in IFRS 18 relate to: the structure of the statement of profit or loss; required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements; and enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes.

The Company is progressing its implementation of IFRS 18 and has completed a preliminary assessment of the expected changes to the presentation of its consolidated statements of income and cash flows. Based on the assessment completed to date, adoption is expected to change the classification and presentation of certain income and expenses and cash flow items, as well as introduce additional disclosure concerning management-defined performance measures and the disaggregation of operating expenses. IFRS 18 will not change the recognition or measurement of the Company's net income. The Company continues to evaluate detailed disclosure, process and system impacts and its assessment has not yet been finalized.

On June 26, 2026, the IASB issued amendments clarifying the fair value option in IAS 28 Investments in Associates and Joint Ventures. Under the amendments, entities whose specified main business activity is investing in particular types of assets may elect to measure qualifying investments at fair value through profit or loss. The amendments also remove the example relating to an investment-linked insurance fund. While the amendments only modify IAS 28, the related measurement elections may affect the presentation of financial performance under IFRS 18. The Company has assessed the impact of these amendments and does not expect the adoption to have a material impact on its consolidated financial statements.

6. Business combinations

Acquisition of Fraser River Pile & Dredge

During the nine months ended September 30, 2026, the Company recorded measurement period adjustments to the purchase price allocation to reflect new information obtained by the Company with respect to the facts and circumstances that existed as of October 10, 2025. The impact of these measurement period adjustments was an aggregate $3,689 decrease in accounts receivable, contract assets, and inventory and prepaid expenses, $4,544 increase in Property and equipment, and $231 increase in deferred income tax liabilities. As a result of these fair value adjustments, the acquisition date bargain purchase gain and deferred income tax expense increased by $855 and $231, respectively, with the net impact recognized as an adjustment to retained earnings as at December 31, 2025.

7. Cash and cash equivalents

	September 30, 2026	December 31, 2025
Accessible cash	**$ 63,186**	$ 38,134
Cash held for joint operations	**179,025**	83,783
Restricted cash and cash equivalents	**25,602**	45,090
	$ 267,813	$ 167,007

Included in cash and cash equivalents as at September 30, 2026 are outstanding cheques in transit of $19,915 (December 31, 2025 - $16,878).

8. Accounts receivable

	September 30, 2026	December 31, 2025
Progress billings on construction contracts	$ **946,923**	$ 612,014
Holdbacks receivable (due within one operating cycle)	**389,449**	293,686
Other	**21,353**	19,538
	$ **1,357,725**	$ 925,238

Holdbacks receivable represent amounts billed on construction contracts which are not due until the contract work is substantially complete and the applicable lien period has expired.

9. Revenue and contract assets

Disaggregation of revenue

The Company disaggregates revenue from contracts with customers by contract type, as this best depicts how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors.

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	**2026**	2025
Public Private Partnerships	$ **26,644**	$ —	$ **43,593**	$ 1,127
Design-build finance and design-build	**1,985**	6,148	**9,765**	49,074
Stipulated sum, unit price and progressive design-build	**386,902**	322,191	**1,051,777**	875,337
Construction management, IPD, alliance agreement, progressive design-build - target price, and cost reimbursable	**885,353**	623,093	**2,022,390**	1,594,219
	$ **1,300,884**	$ 951,432	$ **3,127,525**	$ 2,519,757

Remaining performance obligations

The total value of all contracts awarded to the Company, less the total value of work completed on these contracts as of the reporting date, is referred to as remaining performance obligations. This includes all contracts that have been awarded to the Company whether the work has commenced or will commence in the normal course.

As at September 30, 2026, the aggregate amount of remaining performance obligations from construction contracts was $6,392,843. The value of remaining performance obligations does not include amounts for variable consideration that are constrained, agency relationship construction management projects, and estimated future work orders or other formal documents to proceed to be performed as part of recurring revenue agreements.

The Company expects to recognize approximately 62% of the remaining performance obligations over the next 12 months with the remaining balance being recognized beyond 12 months. This expectation is based on management's best estimate and contains uncertainty as it is subject to factors outside of the Company's control.

The Company's measure of remaining performance obligations is also referred to as "Backlog" and additions to remaining performance obligations are also referred to by the Company as "Securements." These measures may not be comparable with the calculation of similar measures by other entities as Backlog and Securements are not terms defined under IFRS.

Summary of contract balances

The following table provides information about receivables, contract assets and contract liabilities from contracts with customers:

	September 30, 2026	December 31, 2025
Progress billings and holdbacks receivable (note 8)	**$ 1,336,372**	905,700
Contract assets	**189,392**	146,751
Contract assets - stock warrants (note 18)	**10,189**	—
Contract liabilities	**(299,404)**	(142,090)
	$ 1,236,549	$ 910,361

10. Other assets

	September 30, 2026	December 31, 2025
Total Return Swap ("TRS") derivatives (note 22)	**$ 85,800**	$ 15,942
Other	**2,588**	3,711
Other assets	**$ 88,388**	$ 19,653
Less: current portion		
TRS derivative	**85,800**	15,942
Other	**810**	1,031
Current portion	**86,610**	16,973
Non-current portion	**$ 1,778**	$ 2,680

Included in other are lease receivables, pension asset, and subcontractor/supplier insurance deposits relating to the Company's insurance policies.

In March 2026, the Company settled a portion of the outstanding TRS, reducing the notional amount outstanding. The partial settlement resulted in cash receipts of $12,867. (2025 - $nil).

11. Assets held for sale

Assets held for sale	September 30, 2026
Balance, December 31, 2025	**$ 1,360**
Reclassifications as held for sale	**6,380**
Capital distributions received	**(162)**
Sold in the period	**(6,816)**
Balance, September 30, 2026	**$ 762**

During the first quarter of 2026, the Company sold a property that had previously been classified as held for sale in the prior year, for total proceeds of $570. During the third quarter ended September 30, 2026, the Company sold equipment that was classified as held for sale in the previous quarter for proceeds of $6,380.

12. Projects and entities accounted for using the equity method

The Company performs certain construction and concession related projects through joint ventures and associates which are accounted for using the equity method. The Company's joint ventures and associates are private entities and there is no quoted market value available for their shares.

The movement in the investment in projects and entities accounted for using the equity method is as follows:

Investments in equity accounted entities	September 30, 2026
Balance, December 31, 2025	$ 12,263
Share of net income (loss) for the period	3,601
Investments in and advances to equity accounted entities	3,000
	18,864
Capital distributions and repayments received	(5,630)
Balance, September 30, 2026	$ 13,234

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	2026	2025
Share of net income (loss) for the period	$ 3,135	$ 77	$ 3,601	$ 69

Repayments	—	—	(209,375)	(3,497)	(212,872)
Accretion	144	—	—	—	144
Balance, September 30, 2026	$ 247,755	$ 20,000	$ —	$ 11,050	$ 278,805

During the nine months ended September 30, 2026 the Company made short-term draws on the revolving credit facility to fund working capital. The aggregate of short-term draws throughout the period totalled $280,000 with offsetting repayments totalling $260,000 (2025 - $205,000 draws and $110,000 repayments).

Senior unsecured notes

On June 1, 2026, the Company completed a private placement of senior unsecured notes (the "Notes") with an aggregate principal amount of $250,000. The Notes bear interest at a fixed rate of 4.397% per annum, payable semi-annually in arrears on June 1 and December 1 of each year and mature on June 1, 2031. Proceeds from the issuance of the Notes were primarily used to repay the Company's outstanding indebtedness under its non-revolving term loan facility, with the remaining amount available for general corporate purposes. The Notes were issued at par and are carried at amortized cost. Transaction costs of $2,389 incurred in connection with the issuance have been deducted from the carrying amount of the Notes and are amortized over the term of the Notes using the effective interest method.

The Notes are classified as long-term debt as they mature on June 1, 2031. The Notes may be redeemed, in whole or in part, at the Company's option prior to May 1, 2031, at a redemption price equal to the greater of (i) 101% of the principal amount of the Notes being redeemed and (ii) an amount determined by reference to prevailing Government of Canada bond yields, plus accrued and unpaid interest to, but excluding, the applicable redemption date. On or after May 1, 2031, the Notes may be redeemed at the

Company's option at a redemption price equal to 100% of the principal amount of the Notes being redeemed, plus accrued and unpaid interest to, but excluding, the applicable redemption date.

The Notes contain customary indenture covenants that, among other matters, (i) restrict the Company's ability to incur certain secured indebtedness unless the Notes are secured equally and rateably, (ii) require the provision of periodic financial information, and (iii) contain provisions relating to mergers, amalgamations, sales of substantially all assets and change-of-control events. The Company was in compliance with these covenants as at September 30, 2026.

Syndicated credit facility

During the second quarter, the Company amended its committed, syndicated credit facility (the "Syndicated Facility") maturing September 3, 2029. The Syndicated Facility is subject to a number of customary covenants that are tested quarterly, including financial covenants such as a minimum Debt Service Coverage Ratio, maximum Total Funded Debt to EBITDA Ratio, and maximum Direct Funded Debt to EBITDA Ratio. The Company was in compliance with covenants under the facility as at September 30, 2026. The Syndicated Facility consists of the following:

Committed revolving credit facility

The Company has a committed revolving credit facility of up to $500,000 (December 31, 2025 – $400,000) that includes a swingline facility of up to $30,000 which allows the Company to enter into an overdraft position, and $80,000 of letters of credit availability (December 31, 2025 - $100,000). Borrowings under the facility bear interest at variable rates based on the bank prime rate or Canadian benchmark rate plus a spread. A standby fee is payable quarterly on the unutilized portion of the facility.

At September 30, 2026, the Company has $3,506 letters of credit outstanding on the facility (December 31, 2025 – $539) and has drawn $20,000 on the facility (December 31, 2025 – $nil). Draws that are not expected to be settled in the Company's normal operating cycle are considered non-current loans and borrowings on the Company's statement of financial position as the amounts are not expected to be settled in the Company's normal operating cycle, and are not due to be repaid until the maturity of the facility in 2029.

Committed non-revolving term loan facility

In connection with the issuance of the senior unsecured notes on June 1, 2026, the Company fully repaid outstanding amounts on the previous committed non-revolving term loan facility and cancelled the facility. Prior to the cancellation, the term loan had scheduled quarterly repayments and incurred interest at variable rates based on the bank prime rate or Canadian benchmark rate plus a spread. As at September 30, 2026, there was no outstanding balance on the facility (December 31, 2025 – $209,375).

Accordion

The Syndicated Facility includes a non-committed accordion feature allowing the Company to increase the limit of the revolving credit facility up to an additional $100,000 in aggregate. Any increases under the accordion require creditor approval before becoming available to the Company.

Equipment financing

The Company has committed term credit facilities of up to $20,000 available to finance equipment purchases of which $2,652 is outstanding at September 30, 2026 (December 31, 2025 – $1,187). Borrowings under the facilities are secured by a first charge against the specific equipment financed using the facilities. Interest on the borrowings is charged at a fixed rate and is paid monthly in arrears.

The Company also has multiple, fixed interest rate, term loans which were used to finance equipment purchases. At September 30, 2026, the balance outstanding on these term loans amounted to $8,398 (December 31, 2025 – $9,633). Principal and interest are payable monthly, and these term loans are secured by a first charge against the specific equipment financed using these loans.

Letters of credit facilities

Letters of credit represent performance guarantees issued to support the Company's performance obligations on major construction projects. The Company has authorized operating letters of credit facilities totalling $200,000. At September 30, 2026, letters of credit totalling $90,250 (December 31, 2025 – $61,844) were drawn on the facilities. All letters of credit issued under these facilities are supported by the pledge of Company-owned financial instruments, including cash, or through a guarantee from Export Development Canada ("EDC").

The Company has an agreement with EDC to provide performance security guarantees of up to $150,000 for letters of credit issued by financial institutions on behalf of the Company. The Company uses this facility when letters of credit have been issued as contract security for projects that qualify for EDC coverage. At September 30, 2026, EDC has issued performance security guarantees totalling $90,250 (December 31, 2025 – $61,844).

17. Leases and right-of-use liabilities

The Company's lease contracts are effective for periods of one to ten years but may have extension options.

The following table provides details of the changes in the Company's ROU liabilities during the period ended September 30, 2026:

		September 30, 2026
Balance, December 31, 2025	$	106,514
Additions		38,302
Interest		4,267
Lease terminations and modifications		(1,849)
Repayments		(35,862)
Balance, September 30, 2026		111,372
Current portion		34,741
Non-current	$	76,631

The Company has established a number of operating lease facilities with the financing arms of major heavy equipment suppliers. These facilities include one with a fixed credit limit of $25,000, and the others being uncommitted and not subject to a fixed credit limit, providing flexibility to finance equipment leases as required. Draws under these facilities are generally recognized as ROU liabilities, with the lease obligations being secured by the specific leased equipment. At September 30, 2026, the Company had used $11,849 (December 31, 2025 – $13,024) under the fixed limit facility.

18. Stock warrant liabilities

In connection with the Company entering into a strategic partnership with a customer, on May 14, 2026, the Company agreed to issue stock warrants to the customer to acquire up to 2,625,000 common shares of the Company. The warrants vest in multiple tranches, each contingent on the achievement of specified performance milestones based on the delivery of qualifying future projects between the parties over a period of five years. Unvested tranches expire if the performance milestones are not met within the contractual timeframe. All vested warrants are exercisable for a period of seven years from the grant date, and may be exercised on a cash or cashless basis in accordance with the terms of the agreement.

The warrants will be considered in the calculation of diluted earnings per share once the applicable vesting conditions have been satisfied and the warrants become exercisable. Prior to that time, the warrants are considered contingent and are excluded from these calculations. For the recognized unvested warrants, contracts are in place for projects that, upon delivery, are expected to satisfy the applicable vesting conditions.

The fair value of the stock warrants at the grant date was determined using an option pricing model with the following inputs:

	At grant date	September 30, 2026
Share price at grant date	$ 49.85	$ 82.03
Exercise price	$ 52.00	$ 52.00
Risk free rate	3.33 %	3.77 %
Expected life (years)	7.00	6.62
Dividend yield	1.69 %	1.02 %
Expected volatility	30 %	30 %

During the three and nine month periods ended September 30, 2026, the Company recognized a fair value loss in the statement of income in finance and other costs of $11,530 and $19,547, respectively, related to the fair value remeasurement of the stock warrant liabilities (2025 – $nil).

19. Income taxes

Provision for income taxes

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	**2026**	2025
Income tax expense (recovery) comprised of:				
Current income taxes	**$ (5,654)**	$ 16,698	**$ (808)**	$ 22,658
Deferred income taxes	**24,016**	(5,691)	**33,692**	(1,508)
	$ 18,362	$ 11,007	**$ 32,884**	$ 21,150

Income tax rate reconciliation

	Nine months ended September 30,	
	2026	2025
Combined federal and provincial income tax rate	**25.6%**	25.8%
Increase (reductions) applicable to:		
Non-taxable items	**0.3%**	0.6%
Other	**0.3%**	(0.7%)
Effective rate	**26.2%**	25.7%

The Company's statutory tax rate is based on the combined federal and provincial tax rates in the jurisdictions in which the Company operates.

20. Provisions

	Warranty claims and other	Legal	Total
Balance, December 31, 2025	**$ 2,294**	**$ 3,159**	**$ 5,453**
Provisions made during the period	**5,949**	**4,229**	**10,178**
Provisions used during the period	**(4,805)**	**(165)**	**(4,970)**
Provisions reversed during the period	**(1,577)**	**(686)**	**(2,263)**
Balance, September 30, 2026	**$ 1,861**	**$ 6,537**	**$ 8,398**

Various claims and litigation arise in the normal course of the construction business. It is the Company's opinion that an adequate provision has been made for any potential settlements relating to such matters and that they will not materially affect the financial position or future operations of the Company.

21. Other liabilities

	September 30, 2026	December 31, 2025
Liabilities for cash-settled share-based compensation plans (note 22)	$ 125,763	$ 55,057

Cash-settled share-based compensation plans (note 22)	40,599	25,668
Leasehold inducements	105	180
Acquisition holdback and other liability	50	2,639
Current portion	40,754	28,487
Non-current portion	$ 85,164	$ 29,448

22. Share-based compensation plans

Medium term incentive plan ("MTIP"), Equity incentive plan ("EIP") and Deferred share unit ("DSU") plan

	September 30, 2026	December 31, 2025
MTIP liability	$ 2,828	$ 466
EIP liability	77,749	39,607
DSU liability	45,186	14,984
Liabilities for cash-settled share-based compensation plans	125,763	55,057
Less: current portion		
MTIP liability	1,267	38
EIP liability	39,332	25,630
Current portion	40,599	25,668
Non-current portion	$ 85,164	$ 29,389

	September 30, 2026		
	MTIP	EIP[1]	DSUs
Units, beginning of period	61,283	1,717,866	525,373
Granted [2]	5,880	415,510	25,472
Forfeited	(299)	—	—
Vested and paid	—	(765,676)	—
Units, end of period	66,864	1,367,700	550,845

[1] Based on underlying units before the impact of a performance multiplier, but after the effects of the dividend adjustment ratio and the estimated forfeiture rate.
[2] MTIP and DSU grants include dividend reinvestments.

During the first, second and third quarters of 2026, the Company granted 9,041, 5,614 and 4,323 units under the DSU plan at a fair market value of $38.56, $62.10 and $80.63 respectively, excluding dividend reinvestments. The Company also granted 380,785 units under the EIP plan in March 2026 and 9,802 units under the EIP plan and 5,196 units under the MTIP plan in the second quarter of 2026 at a fair market value ranging between $34.31 and $51.81, excluding dividend reinvestments.

Pursuant to the Company's MTIP plan, the units vest over periods ranging from November 2026 to November 2030 and are cash settled no earlier than the vesting date. Payments pursuant to the Company's EIP vest over periods ranging from March 2027 to March 2029 and are cash settled no earlier than the vesting dates. Payments pursuant to the Company's DSU plan, are cash settled no later than December 31 of the following year in which the Director ceases to hold any position within the Company.

Expenses (recoveries) arising from share-based payment transactions[1]

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	**2026**	2025
MTIP	**$ 1,006**	$ 147	**$ 2,362**	$ 554
EIP	**28,923**	5,083	**72,477**	14,701

	$ 39,831	$ 6,674	**$ 105,041**	$ 19,558

[1] Expenses are before the effect of the TRS derivative contract.

The Company entered into a TRS derivative contract for the purpose of managing its exposure to changes in the fair value of its MTIP, EIP and DSU share-based compensation plans, due to changes in the fair value of the Company's common shares. The Company recognized a gain of $24,612 and $82,725 on these derivatives in the statement of income in general and administrative expenses and costs of construction for the three and nine month periods ended September 30, 2026 (2025 - $3,588 gain and $10,634 gain).

23. Shareholders' capital

The Company is authorized to issue an unlimited number of common shares. The Company is authorized to issue unlimited preference shares, which can be issued in series with rights set by the Board of Directors. As at September 30, 2026 and December 31, 2025, no preferred shares have been issued.

	September 30, 2026

27. Financial instruments

Carrying values and fair values

Determination of fair value and the resulting hierarchy requires the use of observable market data whenever available. The classification of a financial instrument in the hierarchy is based upon the lowest level of input that is significant to the measurement of fair value.

The hierarchy of inputs is summarized in note 30 to the Company's December 31, 2025, annual consolidated financial statements.

The Company's TRS derivative contract (note 10) and stock warrant liabilities (note 18) are classified as Level 2 measurements in the fair value hierarchy.

There were no transfers between levels in the fair value hierarchy during the three and nine month periods ended September 30, 2026 and 2025.

The fair value of the Company's loans and borrowings approximates their carrying values on a discounted cash flow basis as the majority of these obligations bear interest at market rates. The fair values of the remaining financial instruments approximate their carrying values due to their relatively short periods to maturity.

Financial risk management

In the normal course of business, the Company is exposed to several risks related to financial instruments that can affect its operating performance. These risks and the actions taken to manage them are as follows:

i. Credit risk

Credit risk relates to the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet their contractual obligation.

With respect to accounts receivable, concentration of credit risk is limited due to the geographic dispersion of revenues and a diversified customer base. Before entering into any construction contract and during the course of the construction project, the Company satisfies itself that the customer has adequate resources to fulfill its contractual payment obligations as construction work is completed. If a customer is unable or unwilling to pay the amount owing, the Company will generally have a right to register a lien against the project that will normally provide some security that the amount owed would be realized.

Short-term deposits and short-term investments, if any, are subject to minimal credit risk as they are placed with only major Canadian financial institutions. Where reasonably practical, these investments are placed with several different Canadian financial institutions, thereby reducing the Company's exposure to a default by any one financial institution.

At September 30, 2026, accounts receivable outstanding for greater than 90 days and considered past due by the Company represent 8.9% (December 31, 2025 – 14.0%) of the balance of progress billings on construction contracts receivable. The Company has recorded an allowance of $135 (December 31, 2025 – $78) against these past due receivables, net of amounts recoverable from others.

ii. Liquidity risk

Liquidity risk relates to the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages this risk through management of its capital structure, monitoring and reviewing actual and forecasted cash flows and the effect on bank covenants, and maintaining unused credit facilities where possible to ensure there are available cash resources to meet the Company's liquidity needs. In managing liquidity risk, the Company has access to committed short and long-term debt facilities as well as equity markets, the availability of which is dependent on market conditions.

The Company has working capital of $508,779 (December 31, 2025 – $264,710) which is available to support surety requirements related to construction projects. Working capital is calculated as total current assets less total current liabilities. As a component of working capital, the Company maintains significant balances of cash and cash equivalents. These balances, less $25,602 held in restricted trust accounts and $179,025 in cash held for joint operations, are available to meet the general financial obligations of the Company as they become due. Restricted cash in trust is held in segregated accounts for payment obligations on certain projects. Refer to note 16 in respect of the Syndicated Facility and the Company's other debt instruments, which further improve the Company's access to liquidity. At September 30, 2026, the Company had a total undrawn balance on its committed revolving credit facility of $476,494 (December 31, 2025 – $399,461). Also, the Company has a non-committed accordion of up to an additional $100,000 to increase the limit of the committed revolving credit facility. The Company also has committed term credit facilities of up to $20,000 (December 31, 2025 – $20,000) available to finance equipment purchases of which $17,348 is undrawn as at September 30, 2026 (December 31, 2025 – $18,813). The Company believes that it has access to sufficient funding through the use of these facilities and its cash and cash equivalents to meet its foreseeable operating requirements.

iii. Market risk

Market risk is the risk that changes in market prices, such as interest rates, equity prices and corporate bond yields, will affect the Company's income or the value of its holdings in liquid securities.

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk to the extent that its credit facilities and TRS derivatives are based on variable rates of interest.

At September 30, 2026, a one percent change in the interest rate applied to the Company's variable rate loans and borrowings and TRS derivative would change annual income before income taxes by approximately $498 (2025 – $2,781).

The Company has certain share-based compensation plans, where the values are based on the common share price of the Company. At September 30, 2026, a 10 percent change in the share price applied to the Company's share-based compensation plans would change income before income taxes by approximately $12,572 (2025 – $5,893).

To partially offset the costs of the share-based compensation plans, the Company has fixed a portion of the settlement costs of these plans by entering into a TRS derivative contract maturing in 2027. The TRS derivative is not designated as a hedge. The change in the value of the TRS derivative is recorded each quarter based on the difference between the notional price and the market price of the Company's common shares at the end of each quarter. The TRS derivative is classified as a derivative financial instrument. At September 30, 2026, a 10 percent change in the share price applied to the Company's TRS derivative would change the fair value of the derivative by approximately $11,551 (2025 – $6,692), with a corresponding impact to income before income taxes.

The Company has stock warrant liabilities where the fair values are determined using, among other assumptions, the Company's common share price. At September 30, 2026, holding all other assumptions constant, a 10 percent increase in the Company's share price would increase the stock warrant liability and decrease income before income taxes by approximately $5,166, while a 10 percent decrease in the Company's share price would decrease the stock warrant liabilities and increase income before income taxes by $5,023 (2025 – n/a).

iv. Currency risk

Currency risk is the risk that fluctuations in currency exchange rates will affect the Company's net income. The Company uses foreign currency to settle payments to vendors and subcontractors in the foreign currency. Foreign currency risk is managed by the Company through the use of foreign currency derivatives. At September 30, 2026, a 10 percent movement in the Canadian and U.S. dollar exchange rate would have changed the carrying value of U.S. dollar denominated assets and liabilities by approximately $96 (2025 – $133), with a corresponding impact to income before income taxes.

28. Commitments and contingencies

Commitments

Outstanding surety lien bonds issued on behalf of the Company in connection with liens by subcontractors and suppliers at September 30, 2026 totalled $65,999 (December 31, 2025 – $98,469). The Company has a minority equity interest in a PPP concession entity (note 12), which requires the Company to make $2,967 in future capital injections. This commitment has been secured by a letter of credit totalling $2,967 (December 31, 2025 - $nil).

Contingencies

The Company is contingently liable for the usual contractor's obligations relating to performance and completion of construction contracts. These include the Company's contingent liability for the performance obligations of its subcontractors. Where possible and appropriate, the Company obtains performance bonds, subcontract/supplier insurance or alternative security from subcontractors. However, where this is not possible, the Company is exposed to the risk that subcontractors will fail to meet their performance obligations. In that eventuality, the Company would be obliged to complete the subcontractor's contract, generally by engaging another subcontractor, and the cost of completing the work could exceed the original subcontract price. The Company makes appropriate provision in the financial statements for all known liabilities relating to subcontractor defaults.

29. Eligible dividends declared with a record date subsequent to statement date

As of the date of the approval of these financial statements, the Board of Directors has declared eligible dividends with a record date subsequent to the date of the financial statements, for the following months:

Eligible dividends declared	Record date	Payment date	Dividend per share
October dividend	October 30, 2026	November 20, 2026	$0.0700
November dividend	November 30, 2026	December 18, 2026	$0.0700
December dividend	December 31, 2026	January 20, 2027	$0.0700
January dividend	January 29, 2027	February 19, 2027	$0.0700
February dividend	February 26, 2027	March 19, 2027	$0.0700
